

A 129 by 36in by 325lb displacement kid's boat
devised to appeal to children and to be easy and
cheap to build. It is intended for use with multiple
sized rigs depending on the child's skill and
experience. This is an experimental design created
by an amateur designer with no qualifications. The
designer accepts no liability for any loss or injury
during building or when using this craft. If you build
this boat please send photos and a report to the
designer at gmatkin@clara.net . Also please display
the Mouseboats logo ~O:> and let out a cheer each
time you pass an Optimist. Copyright Gavin Atkin,
Tunbridge Wells, England 2005
